DIYA CHHODBADIA

diyachhodbadia@gmail.com | 201-680-1372 | www.linkedin.com/in/diya-chhodbadia

CORE COMPETENCIES

Software Testing: Manual Testing • Functional Testing • Regression Testing • Smoke Testing • Integration Testing • User Acceptance Testing (UAT) • Black Box Testing • Exploratory Testing

QA Methodologies: SDLC • STLC • Defect Life Cycle • Test Planning • Test Execution • Test Case Design • Requirement Analysis • Risk Analysis • Agile Test Quandrants

API Testing: Postman •REST APIs •JSON Validation •Status Code Validation •Boundary Testing •Negative Testing • CRUD Operations

Defect management: Jira • Bug Reporting • Root Cause Analysis • Defect Tracking • Test Documentation • Reproduction Steps

Automation & Programming: Selenium WebDriver • Java • Python • SQL • POM • Cypress • Playwrite • CSS • CI/CD

Tools: Jira • ServiceNow • GitHub • Excel • Postman • Figma • Claude AI, AI-assisted Test Case Generation

PROFESSIONAL EXPERIENCE

QA Analyst & UI Validation Intern | *Starland IT Solutions Jan 2023 – Apr 2024*

- Executed functional, regression, smoke, integration, and exploratory testing for multiple responsive web applications.
- Validated complete user workflows including authentication, dashboard, search, shopping cart, checkout, and payment modules, Created reusable automation scripts using Selenium WebDriver and gained hands-on experience building end-to-end Playwright test cases for modern web applications.
- Performed REST API validation using Postman by verifying endpoints, authentication, response payloads, JSON schema, and HTTP status codes.
- Worked with HTML, CSS selectors, XPath, and browser developer tools to identify dynamic UI elements and validate frontend functionality, Logged and tracked software defects in Jira with detailed reproduction steps, screenshots, severity, priority, and business impact.

Service Desk Analyst | *Hasmukh Goswami College of Engineering Feb 2022 – Dec 2022*

- Resolved over 50 technical incidents each month while maintaining SLA compliance.
- Investigated software issues through systematic troubleshooting and root cause analysis.
- Maintained incident documentation using Jira and ServiceNow.
- Collaborated with cross-functional teams to improve issue resolution and documentation quality.
- Validated software fixes before closing production incidents.

QA Validation Associate & Frontend Support| *Pramesh Wealth Management Pvt. Ltd. Aug 2020 – Jul 2021*

- Performed cross-browser compatibility testing across Chrome, Firefox, Safari, and Edge.
- Validated responsive UI behavior across desktop, tablet, and mobile devices.
- Executed functional and regression testing before production deployments.
- Verified user stories against business requirements and acceptance criteria.
- Documented UI defects and collaborated with developers to resolve frontend issues.
- Supported multiple Agile release cycles through validation and regression testing.

QA PROJECTS

REST API Testing Framework — Postman • JSON • REST APIs

- Built a structured Postman collection covering full CRUD operations (GET, POST, PUT, DELETE) against a REST API, organized into folders by endpoint and grouped by resource type for maintainability.
- Used environment variables and pre-request scripts to manage test data and authentication tokens across multiple test runs, avoiding hard-coded values.
- Validated JSON response schemas and status codes (200, 201, 400, 404, 500)to confirm correct API behavior under both valid,invalid inputs.
- Designed negative and boundary test cases — invalid payloads, missing required fields, out-of-range values — to surface edge-case defects before they reached later test cycles.
- Documented each test case with expected vs. actual results and maintained a failure log to speed up debugging handoffs to developers.

E-Commerce Application Testing

- Designed functional and regression test cases.
- Tested search, filters, cart, payment, checkout, and order workflows.
- Reported defects using Jira.
- Conducted User Acceptance Testing before release.

Customer Data Analysis Project

- Queried and analyzed a dataset of 10,000+ customer records using SQL, writing joins and aggregate queries to segment customers by purchasing behavior.
- Performed data validation and cleansing in Python (Pandas) — checking for duplicates, nulls, and inconsistent formatting — to ensure data quality before analysis.
- Built summary views highlighting purchasing trends and high-value customer segments to support business decision-making.

EDUCATION

Master of Science, Computer Science | University of North America | GPA 3.21/4.0 *2024-2026*

Bachelor of Engineering, Information Technology | *Gujarat Technological University* | GPA 3.5/4.0 *2021-2024*

Diploma, Computer Engineering | Gujarat Technological University | GPA 3.8/4.0 *2018-2021*
