DIYA CHHODBADIA

diyachhodbadia@gmail.com | 201-680-1372 | www.linkedin.com/in/diya-chhodbadia | Portfolio | GitHub

CORE COMPETENCIES

Software Testing: Manual Testing • Functional Testing • Regression Testing • Smoke Testing • Integration Testing • User Acceptance Testing (UAT) • Black Box Testing • Exploratory Testing

QA Methodologies: SDLC • STLC • Defect Life Cycle • Test Planning • Test Execution • Test Case Design • Requirement Analysis • Risk Analysis

API Testing: Postman •REST APIs •JSON Validation •Status Code Validation •Boundary Testing •Negative Testing • CRUD Operations

Defect management: Jira • Bug Reporting • Root Cause Analysis • Defect Tracking • Test Documentation • Reproduction Steps

Automation & Programming: Selenium WebDriver • Java • Python • SQL • HTML/CSS

Tools: Jira • ServiceNow • GitHub • Excel • Postman • Figma

PROFESSIONAL EXPERIENCE

QA Analyst & UI Validation Intern | *Starland IT Solutions Jan 2023 – Apr 2024*

- Identified and documented 15+ usability and functional defects across e-commerce applications, improving checkout completion and reducing user navigation issues.
- Performed end-to-end testing on search, filtering, shopping cart, and checkout workflows, ensuring zero critical defects reached production releases.
- Collaborated with developers and business teams during sprint cycles to validate requirements and acceptance criteria.
- Logged and tracked defects in Jira with detailed reproduction steps, screenshots, and severity classification.
- Conducted regression testing before production deployments, reducing release risks and improving software stability.
- Participated in 3+ agile sprint cycles supporting requirement validation and quality assurance activities.
- Performed usability testing and provided recommendations that improved user experience and interface consistency.

Service Desk Analyst | *Hasmukh Goswami College of Engineering Feb 2022 – Dec 2022*

- Resolved more than 50 monthly technical incidents while maintaining structured SLA compliance.
- Achieved over 90% first-contact resolution through systematic troubleshooting and problem diagnosis.
- Conducted root cause analysis on recurring technical issues, reducing repeat incidents.
- Maintained detailed incident documentation using Jira and ServiceNow.
- Collaborated with support teams to improve issue resolution processes and knowledge documentation.

QA Validation Associate & Frontend Support| *Pramesh Wealth Management Pvt. Ltd. Aug 2020 – Jul 2021*

- Validated responsive web interfaces across desktop, tablet, and mobile devices.
- Conducted cross-browser testing to ensure compatibility and consistent application behavior.
- Verified business requirements and user workflows before deployment.
- Participated in usability testing sessions and documented UI defects.
- Collaborated with developers to resolve interface issues and improve user experience.
- Supported multiple release cycles through functional validation and defect retesting.

QA PROJECTS

REST API Testing Framework — Postman • JSON • REST APIs

- Built a structured Postman collection covering full CRUD operations (GET, POST, PUT, DELETE) against a REST API, organized into folders by endpoint and grouped by resource type for maintainability.
- Used environment variables and pre-request scripts to manage test data and authentication tokens across multiple test runs, avoiding hard-coded values.
- Validated JSON response schemas and status codes (200, 201, 400, 404, 500)to confirm correct API behavior under both valid,invalid inputs.
- Designed negative and boundary test cases — invalid payloads, missing required fields, out-of-range values — to surface edge-case defects before they reached later test cycles.
- Documented each test case with expected vs. actual results and maintained a failure log to speed up debugging handoffs to developers.

E-Commerce Application Testing

- Created functional and regression test cases for search, cart, checkout, and payment modules.
- Executed manual testing scenarios covering business requirements.
- Reported defects with detailed evidence and severity classification.
- Performed user acceptance testing before release.

Lucky Three - Interactive Portfolio & QA Case Study - Live Demo

- Rebuilt a python console betting game as a fully interactive JavaScript application, verifying ported logic (weighted symbol draw, multi-line payout calculation, balance tracking) matched the original source exactly.
- Designed and executed a 14 case manual test suite covering input validation, boundary limits, payout accuracy, and balance- tracking edge cases achieved a 100% pass rate.
- Documented each test case with expected vs. actual results and published the test log publicly alongside the working application.

EDUCATION

Master of Science, Computer Science | University of North America | GPA 3.21/4.0 *2024-2026*

Bachelor of Engineering, Information Technology | *Gujarat Technological University* | GPA 3.5/4.0 *2021-2024*

Diploma, Computer Engineering | Gujarat Technological University | GPA 3.8/4.0 *2018-2021*
